WELCOME TO! MEDIC UPDATE 2022

www.oemta.org

WELCOME MEMBERS AND

ATTENDEES:

**Hilton Garden Inn and Edmond
Conference Center
2833 Conference Drive
Edmond, OK 73034**

We continue to rebuild coming out of Covid and EMS Continues to evolve due to the pandemic, many things have changes and it is important we work together to make sure that EMS remains a recognized essential service, and not something that is portrayed on a ATV show.

EMS in Oklahoma and the nation is experiencing a shortage of EMS Providers as well as Health Care Professionals over all. EMS has new opportunities and is now more than ever recognized as a valuable asset to the health care of Oklahoma. It is important that we work together to make sure that we remain at the table and represent our profession and protect the way it evolves

The Practice of EMS needs to be open ended so we can grow to meet the needs of our patients as the situation evolves. We need to make sure that no one limits us from doing what is right for our patients. EMS is growing more in the services we can provide, treat and release and treat and refer to important services will continue to expand as evidenced based treatments guide and the need of all populations grow our role.

Wages are up and this is a good thing for our members, we need to be mindful of health care provider wellness and recuperative time off to nurture our professionals.

New opportunities are abounding as we are welcomed into other health care roles due to our experience and not shut out of these roles when other professionals become better staffed, we bring something special to health care.

We need to support better reimbursement of the services we provide, treat and release and treat and refer are starting to get reimbursed how ever ambulance transportation is asking and not grown to meet the needs of better pay and benefits.

Needless price gouging is occurring on a national level of fuel, medication, IV fluids are just some to the things impacting all EMS services. There need to be a common sense approach to pricing of these valuable commodities. IV fluid shortages, medication shortages and prices that have increased by insurmountable percentages take away from our advancing wages and benefits for EMS Professionals.

Due to the shortage of EMS professionals many politicians may and have developed a knee jerk reaction with out asking EMS what is needed to bring more staff and services to deal with growing call volumes which may reflect the aftermath of the pandemic and want to pass a quick fix and not look at the real problem and support and fund EMS and fail to recognize that EMS has undergone many changes and they need to help us build system that can meet the need of our communities.

To build a better system for EMS's future and for Oklahoma, if just 25% of the licensed EMT's were members we could have full time representation at the legislature to assure the right's of Oklahomas EMS providers were represented. We need to work together to build a better system for us and our patients!

Ray Simpson

Ray Simpson, NRP/RN
President

Special Events at Medic Update 2022

OEMTA Bowl Wednesday July 27 7:00 pm to 10:00 pm

Join us for Year Three of some light hearted competition between the teams that have signed up to take it to the lanes to win honor and maybe a few prizes. Come and socialize and cheer on the teams at The Main Event, 7830 South Santa Fe West, Tulsa, OK 74132 Grab a lane and have a ball!!

OEMTA Awards Reception in the Lobby Area of Conference Center from Thursday July 28 6:00 to 7:00 pm.

Come and join us in the the Lobby area for a little down time and as we prepare to recognize our great providers, meet new friends .

OEMTA Awards Reception Thursday July 29 7:00 pm in the Ball Room 3

Please come enjoy dinner with the OEMTA Board and Help us recognize Oklahoma's Finest EMS providers who have been nominated by their peers for going above and beyond. Groups to be recognized are EMR, EMR Agency, EMT, Basic EMS Service, Advanced Provider (Intermediate or Advanced EMT or Paramedic), Advanced Service, Administrator, Instructor, and Dispatcher. and a special Beverly Doyle Award.

Important note about Badges!

Your badge which is available to at the Registration Booth is your passage into each class and any events and the vendor area. Your badge will be scanned when you attend a class and this information will help compile an education report for you. At the end of the conference you will be asked to respond to a survey (survey monkey) and you will then be issued your attendance at classes after completing the survey.

Your Badge can also be scanned by the vendors to represent who they talked with at the conference and help send you more information that you might have requested.

Questions Call JenaLu at 405-641-3363

This Event is sponsored by - Osage Ambulance's

OEMTA Medic Update 2022

Instructor Update Pre-Conference July 27

Instructor Biography: Austin Mandeville MHS, NRP

As a paramedic by trade I began my career in the early 2000's as an EMT. Quickly developing a passion for medicine, I immediately entered paramedic school in Florida where I graduated valedictorian. I had the pleasure of practicing EMS in Florida, North Carolina, and South Carolina and have served in almost every position in EMS including Operations Director, Training Officer, Field Supervisor, Business Development and Reimbursement, EMT, and Paramedic. I have also served as an Education Director, Paramedic and EMT Program Director, and Executive Director of Educational Institutions. I always took opportunities to teach and held adjunct faculty positions during my time in the field as instruction has always been a passion. In the ever-consistent pursuit of excellence in EMS

and Education I enrolled in Western Carolina University where I received both a Bachelor of Science in Emergency Medical Care and master's degree in Health Sciences. I am currently working towards my Ph.D. in Health Sciences with a dissertation topic of Turnover Intention among EMS Professionals.

I currently hold positions as an Assistant Professor in Emergency Medical Care at Western Carolina University, Executive Director at Lowcountry Regional EMS Council, Committee Chairperson for the South Carolina EMS Association Education and Certification Committee and am a voting member for the South Carolina EMS Advisory Committee and South Carolina EMS Training Committee. My current pursuits are developing modern evidence based educational programs with a special focus in distance, virtual, and asynchronous educational modalities.

OEMTA Medic Update Pre-Conference Instructor Update:

Creating the Ultimate Path to Learning: an evidence-based approach to develop educational models that are both successful and meaningful to instructors and students.

During these sessions we will explore educational best practices and the most recent relevant evidence for how our students learn. We will apply these into practical methods to create meaningful lesson plans and develop engaging educational content to ensure the success of both educators and students alike.

This full day Pre Conference workshop consists of short lectures, activities, and open discussions to ensure an engaging and productive day with key takeaways from the most recent and relevant evidence-based education. This material in whole and in part have been taught and accepted for continuing education and educator credit from the National Registry of Emergency Medical Technicians (provider credential renewal) and the South Carolina Department of EMS (provider and instructor renewal).

OEMTA Instructor Update: July 27, 2022

0800-0845 : Introductions and Coffee Talk: This time will focus on introductions and getting to know the group. We all bring unique aspects to EMS education and we each can learn from each other's experience.

0845-1030 : Getting to know yourself as an Educator and your students as Learners Who am I? Who are They?

Discussion and activity developing an educational philosophy and understanding our students. Different students have different needs and here we will explore the differences between "Traditional" students, adult learners, and experienced learners. Insights into our student population can help determine how we deliver educational content and what may work best for their needs. We also discuss educational ownership and who has the ultimate responsibility of education.

1030-1100 : Turn and Talk Session: Discuss and share who you are as an educator and who are your students as learners. Small group work session to help solidify the principles of understanding ourselves as educators and our students as learners.

1100-1230 : Understanding Outcomes Based Learning, what is the objective? In this topic we will begin to outline the concepts of backwards/intentional design for education. Understanding ourselves and students we can now explore how to ensure our students take the most important information away from our lessons.

1230-1300 : Lunch Break

1300-1400 : Teaching Tools: Interactive activity exploring various methods of instruction from use of traditional tools such as lecture and lab, as well as tools such as group work, projects, games, asynchronous learning, virtual simulations, and many others.

1400-1445 : Assessments, Formative and Summative: Having outlined the tools of our craft we will begin to apply techniques of assessment to develop adaptive learning plans through formative and summative assessment.

1445-1500 : Break

1500-1600 : Putting it all Together: During the last session we will take all our tools and assessments to create a fully evidence-based lesson plan using today's educational best practice.

Medic Update 2022 Guest Speaker

KEN BOUVIER

Presenter

Chief Bouvier is a Nationally Registered Paramedic, known nationally and internationally as a professional EMS speaker. He began his Fire & EMS career as a volunteer firefighter. He was hired by Monsanto in 1975 where he served as a career industrial firefighter until 1984, when he was promoted to Fire Chief & Global Hazardous Materials Team Leader until he retired in 2012 after serving 37 years. While working at Monsanto, he coincidentally worked part-time for New Orleans EMS as an EMT & Paramedic until 2012 when he began working full-time as the Deputy Chief of Operations where he served until he retired in March of 2019. Chief Bouvier served as the EMS Commander of most New Orleans major events including Mardi Gras, 2002 & 2010 Super Bowls and was responsible for Commanding both New Orleans & Mutual Aid Ambulances post Hurricane Katrina. Chief Bouvier was responsible for managing the EMS crews and was featured on the A&E Television Show NIGHTWATCH. Chief Bouvier is the recipient of the 1989 NAEMT National EMT of the Year Award, the 2008 Rocco V. Morando Lifetime Achievement Award and 2019 Louisiana Bureau of EMS Lifetime Achievement Award. Chief Bouvier served as President of the National Association of Emergency Medical Technicians from 2004 – 2006. He is a Life Member of the Westwego Fire Department, Louisiana Firemen's Association and NAEMT. He is an Honorary Member of the Arkansas & Delaware EMT Associations and a member of the Louisiana Fire Chief's Association. Chief Bouvier has an extensive educational background in both Fire and EMS and has made written contributions in 14 EMS textbooks. He presently serves on the EMS World Editorial Advisory Board since 1998. Today, Chief Bouvier continues to serve both Fire & EMS as a professional speaker & educator with 46+ years of experience and currently serves as the Hazardous Materials Officer for the Westwego, Louisiana Volunteer Fire Department.
